Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 21-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 5757561 or 5930057. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 21-38 of present application are substantially the same with exception of the applicant's claims are broad version of the above recited patent's claims. Comparing claim 21, 27 and 32 of present application with claims 1-14 of either above recited patent (, 561 or, 057), the following structural (claim) limitation that are recited in both patents and application are: a first plate having C- shape (cited in claim 2 of either patent), a second plate having L-shape (cited in claim 3 of either patent), a positioning device that can create relative movement

between the first and second plates (claim 1 of either patent), and a plate are essentially as a rectangular shape (claim 9 of either application).

EXAMINER'S COMMENT

3. Corrected priority statement should be entered on the top section of first page of the specification. The present application 09/668024 which filed 9/21/2000, which is a continuation of application 09/175672 filed 10/20/1998 now abandoned, which is a division of 09/071557 filed 5/1/1998 now US patent 5930054, which is a continuation application of 08/756762 filed 11/26/1996 now US patent 5757561.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
